

**Sanitize Instantly
on the go with
Electrolytic Ozone**

**Revolutionary
Compact Ozone Spray**

The BiOLUX Compact Ozone Spray (COS) applies revolutionary electrolysis technology that can **convert your regular tap water into anti-bacterial sanitizing water**. This revolutionary technology can help replace conventional chemical surface sanitizers. Simply fill the bottle with clean tap water, press the button, and the device will instantly convert ordinary water into ozonated water.

After sanitizing, it reverts to oxygen and water immediately without chemical residue. Compared to traditional chemical sanitizers, such as ordinary chlorine-based sanitizers or 75% alcohol, ozonated water is a more effective and safer option. The BiOLUX ozonated water has been approved by the SGS cytotoxicity test; **it is not harmful when in contact with skin.**

Ozonated water is well-known for its fast and powerful sanitization performance; it kills bacteria and viruses in seconds. It has been confirmed that **BiOLUX ozonated water can rapidly inactivate the novel coronavirus (SARS-CoV-2) by 99.9%.**

The Compact Ozone Spray offers effective, safe, and environmentally friendly **sanitization solutions for everyday use.**

RELEASE**

Model: EOS7221

THE PICTURE IS SHOWN FOR ILLUSTRATION PURPOSES ONLY. THE ACTUAL PRODUCT MAY VARY DUE TO PRODUCT ENHANCEMENT.

*According to international authorities: Low concentrations of nitrogen oxides (NOx) may cause coughing, shortness of breath, fatigue, and nausea. When NOx reacts with water, it can easily form nitrous acid. Long-term exposure may be carcinogenic to humans.

99.99%
Removals Bacteria & Viruses

Pathogen control for E. coli, Salmonella, Listeria, and other common pathogens. Ozonated water offers a better and more comprehensive solution than other disinfectants.

30 seconds
Achieve 99.99% sanitizer rate

Disinfection speed is 3000 times faster than chlorine. Ozone is more eco-friendly for disinfection than chemical disinfectants.

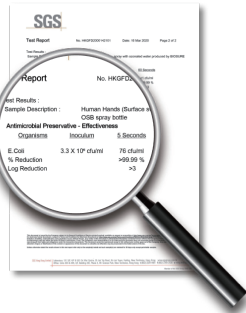

Safety
No matter how much you use

After disinfection, ozonated water reverts to oxygen & water, and it will not cause irritation to the skin. **Ozonated water also eliminates concerns about accidental chemical sanitizer consumption.**

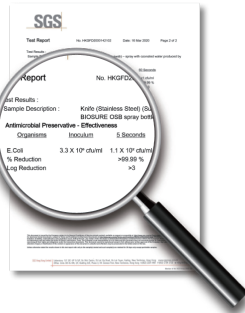

Focus Points

Rapidly Inactivated
SARS-CoV-2

> 99.99%
Hand sanitation

> 99.99%
Surface sanitation

Inspired by Nature
Turns tap water into an effective and safe sanitizer.

Safety
No need to add other chemical additives.

Easy to Charge
USB Type-C rechargeable.

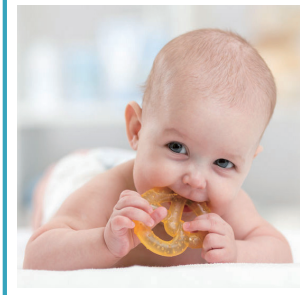

Portable
Easy to use anywhere and anytime.

Office Worker

Maternal-Child Nursing

People with Weakened Immune System

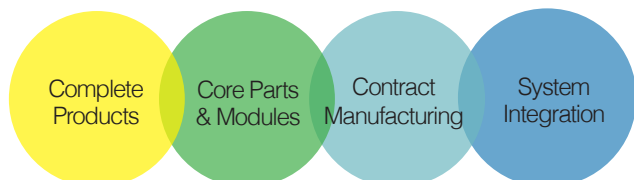

Specifications

Model No.	EOS7221
O ₃ Concentration	1.0 ppm* ¹
Capacity	20 ml
Water Quality	Clean Tap Water* ²
Dimensions	Φ38 x H160mm
Weight (Net)	100g
How to Use	Spray after one-button start
Charger Input	DC5V/1A, USB-C
Charging Time	50 minutes
Material	Titanium Platinum Electrode Module, ABS & PC
Usage	10,000 times* ³

*1. Test standard: water volume = 20ml, TDS = 100ppm, working time = 30 seconds
 *2. Recommended water quality TDS>40ppm, Hardness<180ppm as CaCO₃
 *3. When fully charged, it can be started about 20 times, the actual number of starts is related to the battery condition.

BES Group, parent company of Biolux, has been leading in electrolytic technology since 1988, delivering adaptable ozone and hydrogen solutions through advanced water electrolysis. Serving industries from wellness and HORECA to food processing and water treatment, our products are certified by government authorities and accredited labs to ensure top-tier safety, performance, and quality.
