Japan's Leading High-Purity Hydrogen Generator - 7 Reasons to Choose

1

Top Standard in Japan High-Purity Hydrogen: 999,950 ppm (Hydrogen Purity 99.995%)

Powered by Biolux's patented EHG (Electrolytic Hydrogen Generator) technology, pure water enters the electrolytic cell where hydrogen and oxygen atoms are separated. The hydrogen atoms then recombine and produce high purity hydrogen gas - delivering high standard of hydrogen for your daily use anytime, anywhere.

2

Grade "A" Hydrogen Inhalation Experience

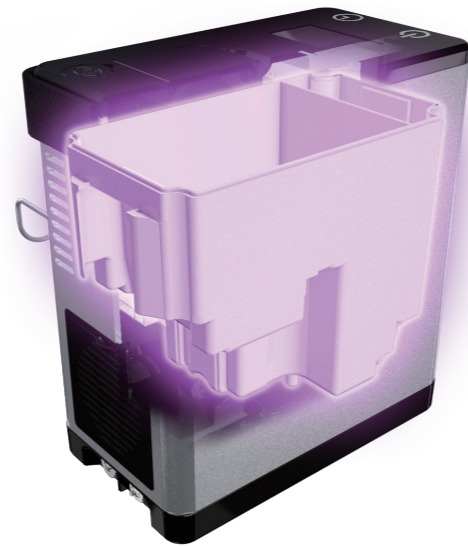

H2Fine adopts AWT (Absorb Water Technology) to prevent water from remaining in the cannula, ensuring a hydrogen inhalation experience that is safe, comfortable, and enjoyable.

3

Fully Automated UV Disinfection Design

For optimal hygiene and odor prevention, H2Fine's water tank features a built-in UV sterilization lamp. The fully automated system inhibits biofilm growth, ensuring every inhalation is pure, safe, and worry-free.

4

Three Intelligent Sensing System – Safeguarding Your Health

Featuring water level/ air blockage/ tilt sensors, the system not only ensures you enjoy high-quality hydrogen but also extends the product's lifespan.

Water Level

5

Supervised by Experts from Japan's Hydrogen Market – The New Standard for Portable Hydrogen Generators

Japan stands among the world's most health-conscious nations, with citizens who deeply value wellness and preventive healthcare. For more than a decade, "hydrogen water" and hydrogen inhalation have gained widespread popularity across the country.

H2Fine has been specifically designed and refined to meet the unique needs and lifestyle preferences of Japanese consumers. The product has successfully launched a new trend in Japan for convenient, portable hydrogen inhalation that fits seamlessly into daily routines.

Hydrogen or Oxygen, Anytime You Want!

H₂ / O₂ Separation Design
Inhale hydrogen, oxygen, or both at once.

Portable Handle:

For a grab-and-go experience.

Intuitive Interface:

Simple to set up and use it.

Hydrogen Generation Window:

See the generation of high-purity hydrogen.

Compact Design:

9.5 cm in width and 19 cm in height - Space-Saving Design

Storage Rack:

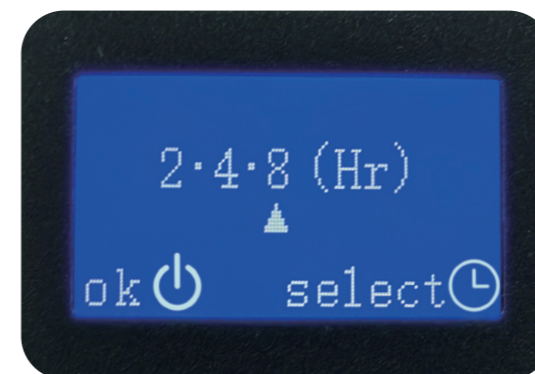

Keep your space neat and tidy.

6

Customizable Inhalation Modes

Choose from 2, 4, or 8-hour inhalation sessions to seamlessly integrate with your daily routine

7

Sleep Mode - Enjoy Quality Rest

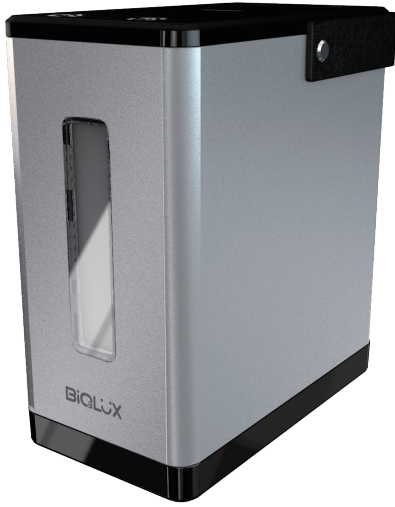

When H2Fine activates sleep mode, the LED lights automatically turn off, providing users with a quality sleep experience.

Specification

H2Fine Hydrogen Air Generator

H2Fine 水素ガス吸入器

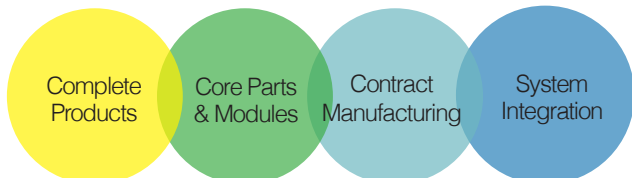

Model No.	EOS7180
Dimension (W x D x H)	95 x 170 x 190 mm
Weight (Net)	1.9 kg
Power Requirement	AC100-240V, 50/60Hz
Power Consumption	84W
Hydrogen Purity	>99.995%
Hydrogen Production	120 ±10 ml/min
Oxygen Production	60 ±5 ml/min
Water Requirement	Purified or distilled water
